

MariscoBot documentation

April 10, 2017

Contents

1 Introduction

MariscoBot is an open source Discord.js bot. It is under the GNU GPLv3 license. Its function is to communicate with Lord Marisa. It also includes a Youtube audio player, a Danbooru image search command, and a pacman emoticon policy-enforcer.

It is based upon node.js, discord.js, ytdl-core, and youtube-search. It's currently in an unfinished beta stage.

2 Commands

#help	: Replies with list of MariscoBot commands
#Talk	: Replies with loud marisco noises
#OUTBEAST	: MariscoBot becomes angry
#Marisa	: MariscoBot praises Lord Marisa
#Hecatia	: MariscoBot recognizes her natural enemy
#OHIO	: MariscoBot greets you
#Dango	: To feed Marisa
#Spread Marisco	: Spread Marisa's greatness all over the channel
#Waifu	: MariscoBot explains who the best waifu is with an image
#Mokou	: Posts Mokou memes with questionable translations
Summon Marisco	: Undocumented magic fuckery ¹
M-play \$x	: Search \$x on youtube and play the first result
Danbooru:\$x	: Search for \$x tag on Danbooru WARNING: NSFW

3 Configuration

3.1 Youtube

```
var optsyt = {
  maxResults: 1,
  key: 'YTKeyHere'
};
```

maxResults: \$x should always be 1 except for debugging.

key: \$x should contain the Youtube Search API key.

3.2 Language

```
const SPANISH = 0;
const ENGLISH = 1;
var LANG = SPANISH;
```

var LANG = \$x should be set to a constant representing the array index that your language uses. By default, this is 0 for Spanish and 1 for English.

¹Someone should really verify the channel is bound before sending a message

3.2.1 Language per Guild

```
// if (msg.guild.id === "guildidhere") let LANG = 1;  
if (msg.content === "/dumpguildid") console.log("Guild ID is " + msg.guild.id + "\n");
```

By default, this is disabled. If used, it should be configured such that `"guildidhere"` is the ID provided by `"/dumpguildid"` and `LANG` is set to whatever language should be used with that guild instead of the default.

3.3 Discord bot API

```
client.login('Discord key Here');
```

`'Discord key Here'` should be set to your bot's API key.
